Experience

Newgen Software   Bangalore,India
Senior Software Engineer   01/2023 - Present

- Promoted to Senior Software Engineer at Newgen, with hands-on experience in BPM, CCM, and ECM product suites. Lead the development of APIs and web services, focusing on robust database integration to enhance product capabilities and client solutions.
- Strong foundation in Core Java, JavaScript, and frameworks such as Collections, Multithreading, and Data Structures. Proficient in SQL queries and procedures.
- Proficiency in crafting and constructing API-driven integration solutions, encompassing API Gateways, API Management solutions, and web services based on REST principles.
- Expertise in working with both relational and document-based databases, including data mapping and manipulation of XML and JSON data formats.
- Skilled in developing API-driven integration solutions, including RESTful web services, SOAP, API Gateways, and API Management platforms, using tools like Swagger for documentation and Sonar Qube for code optimization
- Successfully implemented The Al Rahi Bank Retail Process for Personal Finance and Auto Finance, coordinating directly with clients to gather and deliver on requirements.
- Experienced in Agile methodologies, sprint planning, and delivery tracking for both short-term and long-term software projects.
- Familiar with DevOps practices and tools for code analysis and CI/CD pipeline integration.

Newgen Software   Noida
Software Engineer   07/2021 - 12/2022

- Designing and Development of AL Rajhi Retail Bank Portal, KSA (Saudi Arabia).
- I focused primarily on Template Generation, Web Services, Database management, debugging, and deployment on JBoss Server.
- Administered the JIRA tool and addressed defects and bugs.
